

BDO ENVIRONMENTAL, SOCIAL AND GOVERNANCE SERVICES (ESG)

We believe in the power of business to drive change and doing well by doing good.

Our ESG solutions add risk protection; support operational cost savings; optimize resource flows, environmental and social footprints; enhance your customer and wider societal reputation and highlight growth opportunities for your organization.

We are BDO – your advisor of an ESG powered future

COVID-19 impact management, climate change shocks preparation, meeting consumer demand for more responsible business practices, finding ways to attract and retain talent by demonstrating purpose beyond traditional financial criteria, satisfying rising demand for ESG criteria in tenders and satisfying increased governmental scrutiny such as reporting requirements around transparency and governance...demands on business have never been higher and waves of expectations keep on coming.

Yet some companies continue to create sustainable value for their stakeholders by linking material ESG issues into their customer experience, business processes, strategy, communication and culture. Their vision and commitment to build a resilient organizational foundation based on financial and ESG management is providing an extra level of risk protection while enhancing opportunities to innovate and add stakeholder value.

Is your organization thinking about how ESG can add value, perhaps taking first steps or further advancing your efforts?

BDO ESG TOOLBOX

No matter where your organization is on the ESG journey we have a range of tools and solutions available to protect your value creation regardless of industry, size, preparedness and business environment.

ENVIRONMENTAL
