

OUR SOLUTIONS INCLUDE:

- Risk and materiality assessment
- Risk baseline
- Risk benchmark
- Stakeholder risk analysis

ASSURANCE

Progressive companies today are looking beyond financial statements to report on a range of indicators that demonstrate their sustainability initiatives and corporate responsibility. They enhance their transparency and disclosure practices related to their ecological, social and governance initiatives by increasingly turning to external assurance providers to verify their sustainability efforts. BDO can help your company gain additional credibility, increased stakeholder confidence and enhanced regulatory compliance by assuring your sustainability, CSR and social reports.

OUR SOLUTIONS INCLUDE:

- Assurance according to international best practice standards ISAE3000, AA 1000AS and GRI

LABOUR PROTECTION AND INDUSTRIAL SAFETY

Implementing proper health and safety (H&S) practices helps your business become more resilient to operational risks. Professional H&S management helps to protect the value of your company and meet the expectations of regulators and stakeholders alike. Our method is to evaluate your H&S management system, develop a plan of concrete improvements and assist you with the effective implementation.

OUR SOLUTIONS INCLUDE:

- Professional risk and liability analysis of your H&S system
- Compliance assessment of your H&S system against national regulation and international best practice including OHSAS 18001
- Integration of H&S in your sustainability and stakeholder reporting
- Training and development of your staff in H&S risk prevention

SUSTAINABILITY RISK
MANAGEMENT
SOLUTIONS

WE ARE CONFRONTED BY SUSTAINABILITY RISKS EVERY DAY IN NEWSPRINT AND TV: CARBON EMISSIONS CONTRIBUTING TO THE ACCELERATION OF CLIMATE CHANGE, UNFAIR AND DANGEROUS LABOUR PRACTICES, BRIBERY ALLEGATIONS, THE "OCCUPY MOVEMENT" POINTING FINGERS AT A FAILED BANKING SYSTEM, SOCIAL MEDIA CAMPAIGNS AGAINST COMPANIES POLLUTING COMMUNITIES, SUB STANDARD SUPPLY CHAIN PRACTICES AND INCREASING WATER SHORTAGES.

AS PART OF A GLOBAL ECONOMY, YOUR BUSINESS RUNS THE RISK OF BEING LINKED TO THEM.

AT THE SAME TIME STAKEHOLDERS INCLUDING INVESTORS AND CONSUMERS ARE INCREASINGLY HOLDING COMPANIES RESPONSIBLE FOR MITIGATING AND IDEALLY AVOIDING SUSTAINABILITY RISKS RELATED TO COMPANY OPERATIONS ACROSS THE VALUE CHAIN.

MANAGING SUSTAINABILITY RISK WHILE SECURING CONSISTENT BUSINESS RESULTS MEANS DEALING WITH ALL LAYERS OF SUSTAINABLE BUSINESS PRACTICE: FINANCIAL, SOCIAL AND ECOLOGICAL.

A FRESH SUSTAINABILITY APPROACH OFFERS YOUR COMPANY NEW BUSINESS OPPORTUNITIES TO STAY COMPETITIVE AND DEVELOP A WINNING, SUSTAINABLE BUSINESS MODEL FOR THE FUTURE.

BOTTOM LINE, MANAGING SUSTAINABILITY RISKS ENABLES YOU TO PROTECT AND GROW YOUR COMPANY'S VALUE.

THE BDO APPROACH

Whether you call it corporate social responsibility, corporate responsibility, corporate citizenship, community investment, social responsibility or just sustainability – it is all about how your company manages its financial, social and ecological performance. At BDO, we take the "business ecology" approach to achieve long-term value for your key stakeholders. By maximising opportunities and minimising sustainability risks we can support your company to grow and prosper within your unique "business ecosystem".

OUR SOLUTIONS

SUSTAINABILITY FRAMEWORKS

OUR SOLUTIONS INCLUDE:

- Initial assessment of your material sustainability risks and opportunities
- Taylor-made sustainability frameworks addressing your specific needs Sustainability finance options
- Global Reporting Initiative (GRI) guidelines
- ISO 26000 – social responsibility guidelines (see below for more detail)
- UN Global Compact principles (see below for more detail)
- Dow Jones Sustainability Index guidelines
- The Natural Step sustainability framework

ISO 26000 – SOCIAL RESPONSIBILITY

This voluntary standard it has received acceptance from over 90 countries worldwide. The standard is flexible, adaptable and applicable to all kinds of organisations. We bring it into practice through an introduction course and tailored workshops. We also check how well you are prepared for the recommendations and support the implementation of systems so that you act in accordance with the standard.

OUR SOLUTIONS INCLUDE:

- Training
- Materiality assessment
- Gap analysis
- Improvement programmes
- Reporting requirements

UN GLOBAL COMPACT PRINCIPLES

The UN Global Compact is a global framework for corporate citizenship. By joining, you agree to incorporate ten principles, covering human rights, labour, environment and corruption, in your company's strategy and operations. Through our unique expertise, we introduce you to the requirements, and assist you in identifying critical issues and developing a strategy to improve your performance on the principles. We support you in meeting the annual reporting requirement, and help you understand how you can maximize the benefit from participating in the network.

OUR SOLUTIONS INCLUDE:

- Training
- Risk assessment
- Strategy
- Implementation
- Reporting systems
- Communication on progress

INTEGRATED REPORTING

Integrated Reporting is a groundbreaking approach demonstrating the linkages between an organisation's strategy, governance and financial performance and the social, environmental and economic context within which it operates. By reinforcing these connections, Integrated Reporting can help business to take more sustainable decisions and enable investors and other stakeholders to understand how an organisation is really performing.

WHY REPORT?

Over 100 progressive companies worldwide have already adopted Integrated Reporting as their main reporting platform. Integrated Reporting is helping business worldwide become future proof by strengthening links between corporate strategy, corporate governance, stakeholder communication and risk management screens.

CARBON MANAGEMENT

It is the challenge of our times: how to grow and prosper in a carbon constrained world? International carbon frameworks regulate and set requirements that affect a growing number of industries worldwide. How prepared are you for new national and international regulations, competitive pressures in your market and impacts on your operations and infrastructure due to climate change?

We can help you become carbon aware and provide solutions for greater integration of carbon and energy management into your company's operations with the view to improve your competitiveness and lower your energy related costs.

OUR SOLUTIONS INCLUDE:

- Carbon awareness and measurement programmes
- Energy efficiency programs
- Carbon footprint reporting and footprinting
- Reduction and offset solutions
- GHG protocol and Carbon Disclosure Project (CPD)

ENVIRONMENTAL RISK

Environmental risks are often downplayed by companies leading to potentially greater risk exposure. We identify potential hazards through an environmental risk assessment; an approach that identifies environmental threats, analyses associated risks and produces a set of procedures to deal with them.

OUR SOLUTIONS INCLUDE:

- Risk assessment following best international practice
- Compliance with Ukrainian and international laws
- Improvement programmes best on best practice

SUPPLY CHAIN

Environmental risks are often downplayed by companies leading to potentially greater risk exposure. We identify potential hazards through an environmental risk assessment; an approach that identifies environmental threats, analyses associated risks and produces a set of procedures to deal with them.

OUR SOLUTIONS INCLUDE:

- Supplier risk mapping
- Establishing a Code of conduct
- Supplier risk training
- Supplier Sustainability Audits

RISK PROFILING

Do you control your company's risks in a way that satisfies your shareholders and stakeholders? The BDO risk and materiality assessment analyses your risks and benchmarks your performance in four areas: business integrity and corruption, the environment, employment and society.

If new to sustainability, this first step will help you focus time and resources wisely. If your company is more advanced, it is still a good check to ensure that your corporate sustainability profile is where it is supposed to be.
